

# SLIDING DOOR TERRA M XL

ST.1063.TM.XL

*Premium Edition*

## TERRA M XL ST.1063.TM.XL

### *Premium Edition*

Representative entrances and passage ways can be restaged impressively by huge door elements. MWE's XL construction, engineered by the system Terra M, was especially designed and constructed for this purpose. In this way, door leaves up to 440 kg can be moved. The planner thereby has new possibilities regarding size and choice of material for the door elements. The sliding door system is equipped with a floor runner that can be attached to the floor in different ways. You can screw them, glue them or even let them into the floor, which provides accessibility in the sliding door area. The entire weight of the door leaf (maximum 440 kg) is also transferred to the floor and relieves the walls and ceiling.

#### Overview:

- + For extremely large and heavy door leaves up to 440 kg
- + System with floor track
- + Weight of door leaf is transmitted directly to the floor
- + No visible screw connections
- + Glued, bolted or flushmounted floor track available
